EASY INSTALLATION

1.Place the base iron sheet at the strong magnetic adsorption of the lamp body

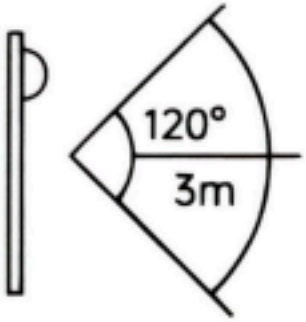

2.tear off the 3M adhesive paper on the iron seet

3.Stick the product where you want to install it

Induction range and precautions

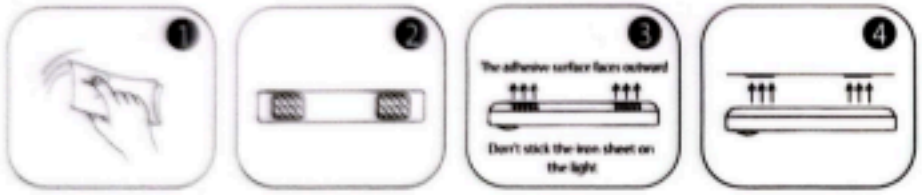

1. The induction range of the lamp is within 3 meters of the center point of the probe at 120°.
2. but improper installation or the probe near the block or affect the induction effect.
3. charging due to light interference may not induction, glass will block human body induction.

Charging instructions

1. please use 5V USB port to charge, such as mobile phone charger, power bank, computer, DC 5V power adapter, USB plug and so on
2. the red light is on when charging, and the green light is on when fully charged.

Installation instructions

1. Please wipe the pasted area clean with a cleaning cloth and ensure that it is dry.
2. Place the magnetic guide sheet on the back of the lamp body and move it to find the position of the built-in magnet.
3. Tear off the adhesive paper on the back of the magnetic guide sheet and glue it to the target position.
4. After installation, the lamp body is adsorbed on the metal surface and can be removed or fixed at any time.

Note: The number of guide pieces is consistent with the number of magnets in the lamp body, and the number of guide pieces varies with different lengths.

Note: Night induction mode: when the light is sufficient, the light will not be on when the person passes by, and the light will only be on when the light is insufficient. The light will be off automatically about 20 seconds after the person leaves.
All-day induction mode: Whether the light is sufficient or not, the light will be automatically on 24 hours a day when it is sensedz.

Note

1. please be fully charged before the first use, otherwise it may be unable to turn on the light due to the circuit protection. (Automatic release of protection after charging)
2. do not use in humid, high temperature, strong light, outdoor and other places.
3. this product can be widely used in bedrooms, wardrobes, cabinets, stairs, bathrooms, cubicles and other places with lighting requirements.

Switch button operation instructions

Holding ⏻ **button:** power on (the light flashes twice, enter the night induction mode)
Press ⏻ **button**: Long bright mode (light flash)
Press ⏻ **button again**: all-day induction mode (light flashes twice)
Press ⏻ **button again**: Night induction mode (light flashes three times)
Holding ⏻ **button**: power off (light flashes four times)

Press ☼ **button**: Cycle switch white light, warm light, neutral light (note: monochrome model does not have this function)
Holding ☼ **button**: Holding the button to adjust the brightness without releasing, release the key to lock the brightness.
